# truckCheck

The truckCheck app is designed to help drivers and operators simplify and digitise daily checks and maintenance procedures.

## truckCheck

TruckCheck application is designed to help drivers and operators digitalise their daily pre and post checks as well as reporting defects whilst on the move.

The electronic walkaround application can be customised to an operator's specific requirements and offers bespoke reporting. It is compliant with the DVSA Earned Recognition Scheme and provides an effortless way to prove your organisation meets driver and vehicle standards.

TruckCheck is fully integrated with DAFcheck which provides efficiency when it comes to reporting defects directly to either the operator or the DAF Dealer directly. TruckCheck also offers the ability to take photos of defects which is also available to all.

## DAFcheck Lite

DAFcheck Lite utilises the same system as DAFcheck for the DAF Dealer network. This is available to operators who carry out their own servicing and repairs.

### Features include:

- Electronic workshop planning and schedule tools
- Workshop control including the management of vehicles
- Issuing of reports
- Connection between DAFcheck (DAF Dealer), Subscriber portal, and TruckCheck
